Vishal Sain

Backend Developer (PHP)

Email: vishalittechxpert@gmail.com | **Phone**: 8852929028 | **Location**: Abohar, Punjab

GitHub: github.com/vishu660 | **LinkedIn**: linkedin.com/in/vishal-sain-881a67333

Profile Summary A passionate PHP Laravel Developer with 6 months of hands-on experience in building dynamic and scalable web applications. Skilled in PHP, Laravel, and MySQL, with a working knowledge of frontend technologies like HTML, CSS, JavaScript, and Tailwind CSS. Experienced in RESTful API development, database design, authentication systems, and implementing third-party integrations such as Razorpay and NOWPayments. I have contributed to real-world projects like smartblindhub.com and dlm.cash, focusing on clean code, performance, and user-centric functionality. Currently contributing at ITTechXpert, enhancing backend efficiency and overall system reliability.

extra Summary

Worked with Laravel, PHP, and MySQL to develop and maintain backend systems – Implemented RESTful APIs, authentication, and user management – Integrated third-party payment gateways such as Razorpay and NOWPayments – Designed and optimized relational databases for performance and scalability – Deployed projects using cPanel on Linux environments – Familiar with frontend tools like Tailwind CSS, JavaScript, and Vite – Comfortable working on macOS and Linux systems – Utilized AI tools (ChatGPT, Cursor) to enhance code quality, speed, and productivity.

Tools & Development

 Git, GitHub, Vite, API Integration, Canva, Figma

Tools & Development

1. Blindshub (https://www.blindshub.com): E-commerce website for window blinds using Laravel (backend) and modern frontend technologies.

 2. DLM Cash (https://dlm.cash):: MLM-based financial web platform built using Laravel, focusing on secure transactions and multi-level user management.

 3. Other internal UI/UX designs for ITTechXpert (not publicly shareable).

Work Experience Backend Developer (PHP Laravel) | 2025 - Present | Abohar, Punjab - Developed scalable backend systems using Laravel, PHP, and MySQL – Built and managed RESTful APIs and authentication – Integrated payment gateways (Razorpay, NOWPayments) – Optimized database performance and deployment on Linux/cPanel servers – Collaborated with frontend teams for seamless API integration.
